RE: **Question & Answer and Provision Revision**
Contract ID: DN00574
County: Haywood, Jackson
Letting Date: June 13, 2017

A bidder has posed the following questions; the corresponding answers are below it:

1. **Question:** We need clarification on the expectations of the NCDOT for "Paving Driveways and Mailbox Turnouts". We usually are able to reach out to catch driveways with the wideners as we go but the way this reads we would have to condition, prime and individually pave each driveway.

Answer: Only paving will be required. See the revised provision below.

2. **Question:** 2. On the "Patching existing pavement" can we expect to use a 4' mill on this patching?

Answer: The patch of a minimum 4' width is required.

The above contract has experienced the following revisions:

On page **G-34**, **replace** the existing provision **SP6 R70BR**, with the following:

PAVING DRIVEWAYS AND MAILBOX TURNOUTS:

(8-21-12)(06-13-17)
610

SP6 R70BR

Surface all driveway and mailbox turnouts as directed by the Engineer. Place pavement on driveway and mailbox turnouts of the same material as used on the main line and in depths directed by the Engineer. Widen the pavement on curves as directed by the Engineer.

These revisions do not change bid items or the associated quantities.
